Contents

0.1 Introduction 3
0.2 About This Book 3

1 Classical Theory of Relations **5**
1.1 Expressions, Sets, Functions, and Relations 5
1.2 Partially-Ordered Sets 5
1.3 Comparing and Composing Relations 5
1.4 Transposition and Inverse 5
1.5 Functions versus Relations 5
1.6 Equivalence Relations and Quotients 5

2 Modal Logic **7**
Review: Classical Logic 7
2.1 Motivation 7
2.2 Kripke Semantics for Basic Modal Logic 7
2.3 Bisimulations 7
2.4 Propositional Dynamic Logic 7
2.5 Modal Logic of Partial Functions 7
2.6 Topological Modal Logic 7
2.7 Kripke Frames and Definability 7
2.8 First-Order Modal Logic 7
2.9 Kripke Semantics for Intuitionistic Logic 7

3 Allegories **9**
Review: Category Theory 9
3.1 Modular Lattices 9
3.2 Allegories 9
3.3 Back-and-Forth Classes 9
3.4 Regular Categories and Allegories 9
3.5 Tabulation, Division, and Distribution 9

3.6 Power and Quotient Allegories 9
3.7 Syntactic Allegories 9
3.8 Enrichment 9
3.9 Bicategories of Relations 9
3.10 Monoidal Categories 9

4 Advanced Topics **11**
Review: Dependent Type Theory 12
4.1 The Allegory of Categories 12
4.2 Allegories in Homotopy Type Theory 12
4.3 Dynamic Topological Logic 12
4.4 Program Construction and Refined Frame Theory 12
4.5 Topological First-Order Modal Logic 12
4.6 IPL and STLC 12
4.7 Regular Logic 12
4.8 Kripke-Joyal Semantics 12
4.9 Hyperdoctrines 12
4.10 Reflective Subcategories and Modalities 12
4.11 (Co)monads and Modality 12
4.12 Modal Type Theory 12

0.1 Introduction

0.2 About This Book

Chapter 1

Classical Theory of Relations

1.1 Expressions, Sets, Functions, and Relations

1.2 Partially-Ordered Sets

1.3 Comparing and Composing Relations

1.4 Transposition and Inverse

1.5 Functions versus Relations

1.6 Equivalence Relations and Quotients

Chapter 2

Modal Logic

Review: Classical Logic

2.1 Motivation

2.2 Kripke Semantics for Basic Modal Logic

2.3 Bisimulations

2.4 Propositional Dynamic Logic

2.5 Modal Logic of Partial Functions

2.6 Topological Modal Logic

2.7 Kripke Frames and Definability

2.8 First-Order Modal Logic

2.9 Kripke Semantics for Intuitionistic Logic

Chapter 3

Allegories

Review: Category Theory

3.1 Modular Lattices

3.2 Allegories

3.3 Back-and-Forth Classes

3.4 Regular Categories and Allegories

3.5 Tabulation, Division, and Distribution

3.6 Power and Quotient Allegories

3.7 Syntactic Allegories

3.8 Enrichment

3.9 Bicategories of Relations

3.10 Monoidal Categories

Chapter 4

Advanced Topics

Review: Dependent Type Theory

4.1 The Allegory of Categories

4.2 Allegories in Homotopy Type Theory

4.3 Dynamic Topological Logic

4.4 Program Construction and Refined Frame Theory

4.5 Topological First-Order Modal Logic

4.6 IPL and STLC

4.7 Regular Logic

4.8 Kripke-Joyal Semantics

4.9 Hyperdoctrines

4.10 Reflective Subcategories and Modalities

4.11 (Co)monads and Modality

4.12 Modal Type Theory
